

# Increase Productivity And Lower your Costs!!!

before...

**Interested?**

If your Series 4 Press is not cycling 26 times per minute (1600 per Hour), or if your press hesitates or is slow out of the blocks when you start the install cycle, then you need to take advantage of the

**PEMSERTER Series 4 Rebuild Program!**

**Get Competitive Again!  
Capture the next Bid!**

The PEMSERTER® Series 4® press has served you well and will continue to do so for many years after you take advantage of the Rebuild Program and the upgrades that are included:

- Improved cycling speed to current standards (1600/hr)
- All Internal components Replaced with current, longer life, and lower maintenance components.
- Hoses, tubing, and fittings replaced.
- New, more advanced main air cylinder.
- New high volume pneumatic pilot valve.
- New controlled retract function to reduce wear.
- New style covers (top, side and back).
- Old press is completely disassembled and the frame is sandblasted and repainted to current standards.
- Plus the press will be returned with a **One Year Warranty!**

## Two Optional Programs Available

**Program A:** Ship your old Series 4 press and we will rebuild it within 3-4 weeks.

**Program B:** With a small Premium charge, we ship out a stock rebuilt Series 4 press upon receipt of your order, and then you ship your original unit to be rebuilt to replace one of our stock units. No down time or lead time! (Please contact us for details.)

Series 4 Rebuild Program Today!!

PennEngineering®

# PEMSERTER® Series 4® Rebuild Program!

## IMPROVE YOUR PRODUCTIVITY

For approximately 30 to 35% less than a new Series 4 press, you could have your old Series 4 rebuilt to new standards of 1600 cycles per hour. All internal parts replaced with current, longer life, lower maintenance components. These changes will allow your older press to operate at current standards. As a bonus, the rebuild comes complete with a 1 year warranty and will include a new factory paint job!!

When you take advantage of the rebuild program, two different programs can be chosen as detailed below.

**\$ 5,200.00**  
plus shipping

### **Program A**

**Customer ships old Series 4 press, PennEngineering, rebuilds and ships back.**

*The customer has the free press time to ship his press to be rebuilt. The press will be rebuilt and shipped back in 15 working days from arrival. The frame can be modified by the customer for this program. Customer pays freight in and out.*

**\$ 5,200.00 + 525.00**  
premium exchange  
plus shipping

### **Program B**

**PennEngineering ships a stock rebuilt unit first, customer then ships original unit to be rebuilt.**

*This is for the customer that can't afford to lose the press for even a day. Customer receives rebuilt press, packs old press and sends it to the factory. Frame can not be modified. To assure the frame is stock, a digital or standard photo, (front, left side, & right side views) needs to be sent to the factory for acceptance prior to shipment of rebuilt press. There is a \$ 525.00 premium charge for this program upon receipt of order. Customer pays freight for return of original press and for the replacement, stock press.*
